FOR IMMEDIATE RELEASE

ScImage PICOM365 Enterprise Imaging Expands Ubiquitous Access

Structured Reporting Now Available in Zero-Footprint Viewer

Los Altos, CA – November 26, 2019 - ScImage, Inc., a leading provider of Enterprise Imaging solutions, announces the expansion of PICOM365 Cloud's anytime, anywhere architecture to include zero-footprint Structured Reporting for complex workflows such as Echo, Stress, Cath SPECT, PET, Holter, Vascular, OB-GYN, Maternal-Fetal Monitoring, and Breast Ultrasound.

Zero-footprint functionality enables clinicians and support staff to read and report from any device, leveraging PICOM365's browser-agnostic environment with no plug-ins or downloads. All existing PICOM365 features - such as flexible report design for customer-specific templates, evidence-based rules that auto-trigger findings, auto-population of measurements from flat files, data parsing, and results integration of nuclear post-processed results from INVIA Corridor 4DM and Cedars-Sinai Cardiac Suite – are supported.

“ScImage has long recognized the value of delivering data where and when it is needed, both to control costs and optimize patient care,” said ScImage's CEO, Sai Raya, Ph.D. “Having normalized measurements, DICOM tags and other discrete data, we're able to provide an elegant browser-driven user experience to our established structured reporting platform. PICOM365's zero-footprint structured reporting empowers physicians to securely work from anywhere with no maintenance or IT support needed and, more importantly, no limitations.”

To learn more or view a demonstration, visit ScImage in booth 2308 at this year's Radiological Society of North America's 104th Annual Scientific Assembly and Annual Meeting held in Chicago, IL.

About ScImage

Founded in 1993, ScImage remains a private, customer-first company with a mission to provide innovative enterprise imaging solutions to the healthcare industry. ScImage's unique single-database PICOM365 enterprise platform delivers end-to-end imaging workflow for Cardiology, Radiology, Women's Health, Orthopedics, Ophthalmology and more. Scalable from a single physician practice to a multi-hospital enterprise, PICOM365 is customizable and can be delivered on-premise, in the Cloud, or as a hybrid. The perfect synchrony created between on-site and Cloud resources allows PICOM365 to provide secure VPN-less image exchange solutions among legacy silo systems, Cloud users, and various EHR systems.
