FOR IMMEDIATE RELEASE

ScImage Enterprise Imaging Live at Naval Hospital

Enterprise Radiology & Cardiology PACS at Naval Medical Center Camp Lejeune

Los Altos, CA – November 18, 2019 - ScImage, Inc., a leading provider of Enterprise Imaging solutions, confirms they have successfully completed the installation of an enterprise system for diagnostic reading and reporting of Radiology and Cardiology studies at Naval Medical Center Camp Lejeune, a United States Navy-run facility located on Marine Corps Base Camp Lejeune in North Carolina.

The site went live with Cardiology in November 2018 with workflows for Echocardiology and Nuclear Medicine with integrated post-processing, ECG, Stress, and Holter. Radiology workflow went live in November 2019 and includes Mammography, Obstetrics, CT, CR, MRI, RF, DEXA, and Orthopedics. The enterprise project encompasses not only Naval Medical Center Camp Lejeune, but also remote reading of Radiology studies from Naval Health Clinic Cherry Point and seven outlying clinics.

The enterprise system archives all studies to the Department of Defense's Enterprise Clinical Imaging Archive (ECIA) and communicates with the DoD's current EHR, Composite Health Care System (CHCS). ScImage is prepared for future HL7 integration with MHS GENESIS, having been the first Cardiology PACS vendor to go live with the Wave 1 integration utilizing secure TLS 1.2 protocols.

"ScImage's agile PicomEnterprise solution offers workflows for all user types and needs, including integrating specialty Radiology and complex Cardiology procedures that have historically resided in their own data silos," said ScImage's CEO, Sai Raya, Ph.D. "Leveraging a single database-driven core framework, our agile architecture and minimal hardware requirements provide our customers incredible cost savings, not only at the point of purchase, but also for long-term maintenance."

About ScImage

Founded in 1993, ScImage remains a private, customer-first company with a mission to provide innovative enterprise imaging solutions to the healthcare industry. ScImage's unique single-database PICOM365 enterprise platform delivers end-to-end imaging workflow for Cardiology, Radiology, Women's Health, Orthopedics, Ophthalmology and more. Scalable from a single physician practice to a multi-hospital enterprise, PICOM365 is customizable and can be delivered on-premise, in the Cloud, or as a hybrid. The perfect synchrony created between on-site and Cloud resources allows PICOM365 to provide secure VPN-less image exchange solutions among legacy silo systems, Cloud users, and various EHR systems.
