

Vital, a Canon Group company, has a legacy of leadership in healthcare imaging using smart algorithms and techniques of innovation spanning 30 years. As the premier provider of an Enterprise Imaging (EI) solution focused on interoperability, Vital transforms and seamlessly connects disparate PACS and other data into an efficient, perceptive and interoperable EI solution. Through modular and scalable enterprise message orchestration, enterprise visualization and enterprise analytics solutions, Vital's Vitrea® Enterprise Imaging solution makes data accessible across the entire enterprise anytime, anywhere, and in any standardized form. Today, Vital is selectively embedding intelligence and leveraging decades of smart algorithms in advanced visualization, giving clinicians the ability to make real-time precise decision-making for today's empowered healthcare consumer while delivering an exceptional patient care experience.

Vitrea Enterprise Imaging

Transforming healthcare through standards-based interoperability

Vitrea Connection

Often unseen by the clinician, Vitrea Connection is the foundation upon which our visualization and resource planning solutions excel. It is the engine that constantly renews and refreshes all the relevant information from disparate sources in real-time and seamlessly delivers it to the applications at the point of care. You stay connected to the ever-changing patient story, able to make effective decisions and improve patient care because you have the longitudinal view of the patient record.

Through our years of experience, we have developed a modular viewing platform that can be configured to meet the unique viewing needs of all users, providing access to required images from across your enterprise anytime, anywhere.

Vitrea Vision

Vitrea Vision is built on Vital's 30-year legacy in advanced visualization technology. As pioneers in this field, we proudly continue to deliver innovative imaging analysis and viewing solutions. Through our years of experience, we have developed a modular viewing platform that can be configured to meet each user's unique needs, providing access to required images from across your enterprise anytime, anywhere.

Vitrea Intelligence

Vitrea Intelligence is an extensible suite of management support tools including the Practice Management and Opportunity Navigator™ modules that unlock access to the data you need to make evidence-based decisions to continuously improve efficiency and quality across the practice.

History

Vital Images, Inc. was founded in 1988 by Dr. Vincent Argiro (retired) on the belief that advanced visualization technology could revolutionize medical practice by strengthening the ability to non-invasively see and analyze anatomy or pathology, enhancing communication among medical professionals and patients and improving pre-procedural planning, as well as postsurgical follow up.

For over one hundred years Canon Medical has been at the forefront of innovation in medical imaging. Since 1915 and the introduction of Japan's first X-Ray tube, Canon Medical's "Made for Life" philosophy and focus on patients, partnerships and customers' has seen the development of many world first clinical and technology solutions, such as the first linear array ultrasound, the first commercial MR system, and the first 320-row area detector CT.

Customers

Now with the global power of Canon Group, Vital is leading real-time healthcare. Our enterprise imaging solutions are used at more than 5,000 hospitals in more than 83 countries across the globe, including many leading institutions listed on U.S. News & World Report's Best Hospital Honor Roll.
