PASSPORT SR

Auto-populate your dictation
system with measurements
from any modality

Passport SR

Passport SR allows you to auto-populate modality measurements from any manufacturer directly into your dictation system. Passport receives DICOM Structured Reports (SRs) and provides a normalized view of the measurements seamlessly into dictation templates. This automation saves radiologists time and eliminates errors from the report.

FEATURES

Normalize Report Measurements
- All measurements that are auto-populated into the report template will have consistent rounding and units

Compatible
- Works with all modality manufacturers and models
- Integrates measurements from any DICOM SR or HL7 message
- Supports Nuance 360, 3M MModal, Dolbey and other dictation systems
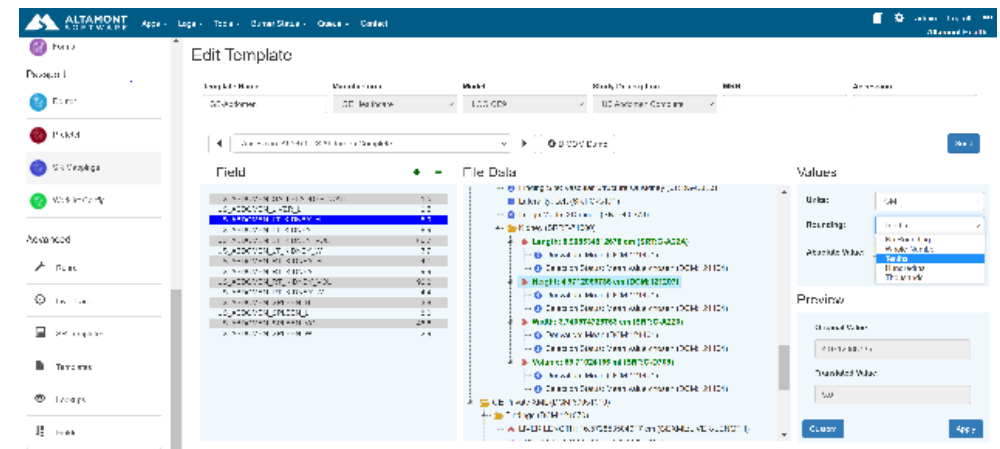

Simple to Configure
- Easy to use point and click mapping tool
- Simple pulldowns to convert dates and weights/measures
- Uses historical data to see results immediately during configuration

eForm Support
- Add Altamont eForm functionality to allow users to add additional information to the report
- Technologists can QA/Modify SR measurements from the eForm

Audits
- Single, central location for reviewing HIPAA audit information

Passport SR Benefits

- Auto-populating modality measurements eliminates errors.

- Passport increases productivity allowing radiologists to spend more time interpreting the exam.

- Creates reports with more detail and a standardized format.

Typical Exam Types Supported

- OB-Gyn
- Abdominal
- Pelvic
- Vascular
- Thyroid

- DEXA/BMD
- CT Dose
- Testicular
- Bladder
- Breast

How It Works

Its as simple as 1,2,3...
1. Modality sends DICOM SR measurements to Passport
2. Passport normalizes the data and send them to dictation
3. Dictation system shows the measurements in the template

Platform Server Requirements

COMPONENT	REQUIREMENT
Operating System	Windows Server 2016 Windows Server 2019
Network Interface	1GB/s recommended
Disk Storage	100 GB of available hard-disk space
Memory	8 GB Minimum
Browser	Google Chrome version 37 or later Internet Explorer 11 or later Mozilla Firefox version 47 or later Microsoft Edge Safari
.NET Framework	.NET Framework Version 4.5 or later

About Altamont Software

Altamont Software develops leading edge medical image connectivity software. Altamont's next generation applications are designed from the ground up to provide enterprise level deployment, management, security and auditing functions. These critical features comprise Altamont's image connectivity platform which serves as the cornerstone for our full line of medical imaging products.
