

# Apollo Enterprise Imaging and Radical Imaging Announce Integration of FlexView Inside **arcc**<sup>®</sup>

*Integration will enable Apollo to focus on its strengths in solving today's challenges in medical image management and multi-disciplinary use cases*

BOSTON, November 3, 2023 – Radical Imaging LLC, an innovative provider of medical imaging viewer solutions, and Apollo Enterprise Imaging Corp, a leading provider of enterprise imaging and clinical multimedia management solutions, today announced the integration of FlexView, Radical Imaging's viewer-as-a-service, inside of Apollo's multi-disciplinary medical imaging platform, **arcc**<sup>®</sup>. This integration will give users of **arcc** a fast, streamlined, easy to use image viewing and analysis experience.

“By integrating FlexView in our **arcc** platform, we are able to give our users the visualization tools they need right now, without the distraction of building and maintaining our own medical image viewer. This will allow us to focus on where we can add the most value,” said Mark Newburger, CEO, Apollo. Integration of the FlexView medical imaging viewer inside **arcc** took less than one week to complete.

**arcc** supports health systems to organize and access medical imaging across numerous departments, delivers more efficient clinical workflows, and enhances multidisciplinary collaboration throughout the health system by converging all image viewing to a single pane of glass.

FlexView is a professionally supported, SaaS cloud medical imaging viewer created by Radical Imaging. FlexView is a commercial-grade, production-ready solution that can quickly and easily be integrated into any medical imaging system that needs to present medical images for users to interact with, and it can be customized to fit any workflow.

Creating and maintaining a custom medical image viewer can be a large up-front and continued investment of time and money. Integrating FlexView as the viewer in a medical platform can get a platform to market faster and save on long-term maintenance costs.

## **About Radical Imaging LLC**

Radical Imaging is a software company focused entirely on medical imaging. It offers software system design and planning, contract software development, and consulting to help its partners solve their most challenging medical imaging problems using modern cloud and web platforms like Cornerstone.js and the Open Health Imaging Foundation (OHIF) which it co-developed with

Massachusetts General Hospital. In 2023, Radical Imaging released its first product, FlexView. For more information, visit [RadicalImaging.com](https://RadicalImaging.com) and [FlexView.ai](https://FlexView.ai).
